GEOPHYSICAL JOURNAL INTERNATIONAL BY VOLUME 98
SUBJECT INDEX

Aegean

Comments on 'Preseismic quiescence before large earthquakes in the Aegean and surrounding area' by Karakaisis *et al.* (1987) (Papadopoulos, G.A.), **98**, 403
Reply on the comments of G.A. Papadopoulos on the paper 'Preseismic quiescence before large earthquakes in the Aegean and surrounding area' (Karakaisis, G.F., Panagiotopoulos, D.G., Krimnianiotou, M.Ch., Papazachos, B.C.), **98**, 405
Seismotectonics and the earthquake frequency–magnitude distribution in the Aegean area (Main, I.G., Burton, P.W.), **98**, 575

Alps

A fine structural section through the crust and lower lithosphere along the axial region of the alps (Yan, Q.Z., Mechie, J.), **98**, 465

Anisotropy

Crustal structure and possible anisotropy in Turkey from seismic surface wave dispersion (Mindevalli, O.Y., Mitchell, B.J.), **98**, 93
Surface waves in weakly anisotropic structures: on the use of ordinary or quasi-degenerate perturbation methods (Maupin, V.), **98**, 553

Artificial intelligence

Artificial intelligence techniques in seismic signal interpretation (Chiaruttini, C., Roberto, V., Saitta, F.), **98**, 223

Attenuation

Numerical modelling of SH Lg waves in and near continental margins (Regan, J., Harkrider, D.G.), **98**, 107

Body waves

Long-period precursors to pP from deep-focus earthquakes: the Moho underside reflection pMP (Schenk, T., Müller, G., Brüstle, W.) **98**, 317
The effect of crustal scattering on observed high-frequency earthquake seismograms (Ebel, J.E.), **98**, 329

Book review

Book review (Tarling, D.H.), **98**, 409
Book review (Christensen, N.I.), **98**, 633

Continental deep drilling

Book review (Christensen, N.I.), **98**, 633

Continental margins

Numerical modelling of SH Lg waves in and near continental margins (Regan, J., Harkrider, D.G.), **98**, 107
Finite element modelling of surface wave transmission across regions of subduction (Drake, L.A., Bolt, B.A.) **98**, 271
The Hatton Bank continental margin—III. Structure from wide-angle OBS and multichannel seismic refraction profiles (Morgan, J.V., Barton, P.J., White, R.S.), **98**, 367

Convection

A benchmark comparison for mantle convection codes (Blankenbach, B., Busse, F., Christensen, U., Cserepes, L., Gunkel, D., Hansen, U., Harder, H., Jarvis, G., Koch, M., Marquart, G., Moore, D., Olson, P., Schmeling, H., Schnaubelt, T.), **98**, 23
Mantle convection model with a dynamic plate: topography, heat flow and gravity anomalies (Davies, G.F.), **98**, 461

Cracked media

Pressure dependence of permeability : a model for cracked rocks (Gavrilenko, P., Gueguen, Y.), **98**, 159

Crustal structure

Crustal structure and possible anisotropy in Turkey from seismic surface wave dispersion (Mindevalli, O.Y., Mitchell, B.J.), **98**, 93
Long-period precursors to pP from deep-focus earthquakes: the Moho underside reflection pMP (Schenk, T., Müller, G., Brüstle, W.), **98**, 317

Deep seismic reflection

Water in the lower continental crust: modelling magnetotelluric and seismic reflection results (Hyndman, R.D., Shearer, P.M.), **98**, 343
Deep seismic reflection processing in the complex demodulate domain: basic theory and application to residual static estimation (Roberts, R.G., Dahl-Jensen, T.), **98**, 543

(Earthquake catalogue)

A revised and extended earthquake catalogue for Greece since 1900 (Makropoulos, K.C., Drakopoulos, J.K., Latousakis, J.B.), **98**, 391

Earthquake source mechanism

The Makran earthquake of 1983 April 18: A possible analogue to the Puget Sound earthquake of 1965? (Laane, J.L., Chen, W.-P.), **98**, 1
Possible focal mechanism change during reactivation of a previously ruptured subduction zone and stress tensor implications (Tajima, F., Célérier, B.), **98**, 301
The seismic disturbance on 1986 August 1 near Novaya Zemlya: a source of concern? (Marshall, P.D., Stewart, R.C., Lilwall, R.C.), **98**, 565

Earthquakes

The Makran earthquake of 1983 April 18: A possible analogue to the Puget Sound earthquake of 1965? (Laane, J.L., Chen, W.-P.), **98**, 1
Spectral characteristics of the 1986 September 13 Kalamata (southern Greece) earthquake (Stavrakakis, G.N., Drakopoulos, J., Latoussakis, J., Papanastassiou, D., Drakatos, G.), **98**, 149
A revised and extended earthquake catalogue for Greece since 1900 (Makropoulos, K.C., Drakopoulos, J.K., Latousakis, J.B.), **98**, 391
Seismological and field observations of the 1984 Lazio–Abruzzo earthquakes: implications for the active tectonics of Italy (Westaway, R., Gawthorpe, R., Tozzi, M.), **98**, 489
The seismic disturbance on 1986 August 1 near Novaya Zemlya: a source of concern? (Marshall, P.D., Stewart, R.C., Lilwall, R.C.), **98**, 565
Seismotectonics and the earthquake frequency–magnitude distribution in the Aegean area (Main, I.G., Burton, P.W.), **98**, 575

Earth's core

Ellipticity and density at the inner core boundary from subcritical PKiKP and PcP data (Souriau, A., Souriau, M.), **98**, 39
On the use of horizontal components of magnetic field in determining core motions (Barraclough, D., Gubbins, D., Kerridge, D.) **98**, 293

Earth's crust

Water in the lower continental crust: modelling magnetotelluric and seismic reflection results (Hyndman, R.D., Shearer, P.M.) **98**, 343

Earth's lithosphere

A fine structural section through the crust and lower lithosphere along the axial region of the alps (Yan, Q.Z., Mechie, J.), **98**, 465

Earth's mantle

A benchmark comparison for mantle convection codes (Blankenbach, B., Busse, F., Christensen, U., Cserepes, L., Gunkel, D., Hansen, U., Harder, H., Jarvis, G., Koch, M., Marquart, G., Moore, D., Olson, P., Schmeling, H., Schnaubelt, T.), **98**, 23
Mantle flow induced by back arc spreading (Ribe, N.M.), **98**, 85
Rheological models and interpretation of postglacial uplift (Körnig, M., Müller, G.), **98**, 243
Lateral heterogeneities in mantle viscosity and post-glacial rebound (Gasperini, P., Sabadini, R.) **98**, 413
Mantle convection model with a dynamic plate: topography, heat flow and gravity anomalies (Davies, G.F.), **98**, 461

(Electrical resistivity)

Water in the lower continental crust: modelling magnetotelluric and seismic reflection results (Hyndman, R.D., Shearer, P.M.), **98**, 343

Electromagnetic (EM) methods

A spatial and spectral analysis of the electromagnetic sensitivity in a layered earth (Boerner, D.E., West, G.F.), **98**, 11

Electromagnetic methods

Deep transient electromagnetic soundings with a grounded source over near-surface conductors (Newman, G.A.), **98**, 587

EM modelling

A spatial and spectral analysis of the electromagnetic sensitivity in a layered earth (Boerner, D.E., West, G.F.), **98**, 11
A finite-difference algorithm for the transient electromagnetic response of a three-dimensional body (Adhidjaja, J.I., Hohmann, G.W.), **98**, 233

Explosion seismology

A fine structural section through the crust and lower lithosphere along the axial region of the alps (Yan, Q.Z., Mechie, J.), **98**, 465

Fault models

Exactly solvable two-fault model with seismic radiation (Lomnitz-Adler, J., Peréz Pascual, R.) **98**, 131
Coupled seismic faults and the predictability of earthquakes by means of deterministic models (Lomnitz-Adler, J., Peréz Pascual, R.), **98**, 143

Fréchet derivatives

Fréchet derivatives and single scattering theory (Boerner, D.E., West, G.F.), **98**, 385

Free oscillations

Thomson–Haskell matrix method for free spheroidal elastic oscillations (Martinec, Z.), **98**, 195
Multiplet coupling of the normal modes of an elliptical, transversely-isotropic earth (Henson, I.H.), **98**, 457

Geomagnetic secular variation

On the use of horizontal components of magnetic field in determining core motions (Barraclough, D., Gubbins, D., Kerridge, D.), **98**, 293

Geomagnetism

On the use of horizontal components of magnetic field in determining core motions (Barraclough, D., Gubbins, D., Kerridge, D.), **98**, 293

Geothermics

An inverse approach to heat flow study in hydrologically active areas (Wang, K., Beck, A.E.), **98**, 69

Glacial rebound

Rheological models and interpretation of postglacial uplift (Körnig, M., Müller, G.), **98**, 243
Lateral heterogeneities in mantle viscosity and post-glacial rebound (Gasperini, P., Sabadini, R.) **98**, 413

Gravity

The Vardar ophiolite: a continuous belt under the Axios basin sediments (Kiriakidis, L.G.), **98**, 203

Gravity field

Critical paths and topological structure of the Earth's gravity field (Bocchio, F.), **98**, 623

Greece

Spectral characteristics of the 1986 September 13 Kalamata (southern Greece) earthquake (Stavrakakis, G.N., Drakopoulos, J., Latoussakis, J., Papanastassiou, D., Drakatos, G.), **98**, 149
A revised and extended earthquake catalogue for Greece since 1900 (Makropoulos, K.C., Drakopoulos, J.K., Latousakis, J.B.), **98**, 391
A microearthquake study in the Gulf of Patras region, western Greece, and its seismotectonic interpretation (Melis, N.S., Brooks, M., Pearce, R.G.), **98**, 515

Hydrology

An inverse approach to heat flow study in hydrologically active areas (Wang, K., Beck, A.E.), **98**, 69

Inverse problem

An inverse approach to heat flow study in hydrologically active areas (Wang, K., Beck, A.E.), **98**, 69

Inverse theory

Fréchet derivatives and single scattering theory (Boerner, D.E., West, G.F.), **98**, 385

Inversion

Determination of the seabed porosity and shear modulus profiles using a gravity wave inversion (Yamamoto, T., Trevorrow, M.V., Badiey, M., Turgut, A.), **98**, 173

Italy

Seismological and field observations of the 1984 Lazio–Abruzzo earthquakes: implications for the active tectonics of Italy (Westaway, R., Gawthorpe, R., Tozzi, M.), **98**, 489

Laboratory studies

Light, radiofrequency emission and ionization effects associated with rock fracture (Martelli, G., Smith, P.N., Woodward, A.J.), **98**, 397

Lateral heterogeneity

Three-dimensional modelling of upper mantle structure under the Pacific Ocean and surrounding area (Zhang, Y.S., Tanimoto, T.), **98**, 255
Seismic representation theorem coupling: synthetic SH mode sum seismograms for non-homogeneous paths (Regan, J., Harkrider, D.G.) **98**, 429
On the nature of regional seismic phases—I. Phase representations for Pn, Pg, Sn, Lg (Kennett, B.L.N.) **98**, 447

Magnetics

The Vardar ophiolite: a continuous belt under the Axios basin sediments (Kiriakidis, L.G.), **98**, 203

Magnetotellurics

Water in the lower continental crust: modelling magnetotelluric and seismic reflection results (Hyndman, R.D., Shearer, P.M.), **98**, 343

Mantle convection

A benchmark comparison for mantle convection codes (Blankenbach, B., Busse, F., Christensen, U., Cserepes, L., Gunkel, D., Hansen, U., Harder, H., Jarvis, G., Koch, M., Marquart, G., Moore, D., Olson, P., Schmeling, H., Schnaubelt, T.), **98**, 23
Mantle convection model with a dynamic plate: topography, heat flow and gravity anomalies (Davies, G.F.), **98**, 461

Mantle flow

Mantle flow induced by back arc spreading (Ribe, N.M.), **98**, 85

Mantle structure

Three-dimensional modelling of upper mantle structure under the Pacific Ocean and surrounding area (Zhang, Y.S., Tanimoto, T.), **98**, 255

Microearthquakes

Extension related to a high topography: results from a microearthquake survey in the Andes of Peru and tectonic implications (Deverchère, J., Dorbath, C., Dorbath, L.), **98**, 281
A microearthquake study in the Gulf of Patras region, western Greece, and its seismotectonic interpretation (Melis, N.S., Brooks, M., Pearce, R.G.), **98**, 515

Microseismicity

Observations of microseismicity in the southern Kuril Trench area by arrays of ocean bottom seismometers (Hirata, N., Kanazawa, T., Suyehiro, K., Iwasaki, T., Shimamura, H.), **98**, 55

Mineralogy

Mineralogy, porosity and fluid control on thermal conductivity of sedimentary rocks (Brigaud, F., Vasseur, G.), **98**, 525

(Moho reflection)

Long-period precursors to pP from deep-focus earthquakes: the Moho underside reflection pMP (Schenk, T., Müller, G., Brüstle, W.), **98**, 317

Normal faulting

Seismological and field observations of the 1984 Lazio–Abruzzo earthquakes: implications for the active tectonics of Italy (Westaway, R., Gawthorpe, R., Tozzi, M.), **98**, 489

Normal modes of the Earth

Multiplet coupling of the normal modes of an elliptical, transversely-isotropic earth (Henson, I.H.), **98**, 457

North Atlantic

The Hatton Bank continental margin—III. Structure from wide-angle OBS and multichannel seismic refraction profiles (Morgan, J.V., Barton, P.J., White, R.S.), **98**, 367

Ophiolites

The Vardar ophiolite: a continuous belt under the Axios basin sediments (Kiriakidis, L.G.), **98**, 203

Pacific Ocean

Three-dimensional modelling of upper mantle structure under the Pacific Ocean and surrounding area (Zhang, Y.S., Tanimoto, T.), **98**, 255

Palaeomagnetism

Drilling-induced remanent magnetization in basalt drill cores (Audunsson, H., Levi, S.), **98**, 613

Plate tectonics

Book review (Tarling, D.H.), **98**, 409

Porosity

Determination of the seabed porosity and shear modulus profiles using a gravity wave inversion (Yamamoto, T., Trevorrow, M.V., Badiey, M., Turgut, A.), **98**, 173

Water in the lower continental crust: modelling magnetotelluric and seismic reflection results (Hyndman, R.D., Shearer, P.M.), **98**, 343

Mineralogy, porosity and fluid control on thermal conductivity of sedimentary rocks (Brigaud, F., Vasseur, G.), **98**, 525

Remanent magnetisation

Drilling-induced remanent magnetization in basalt drill cores (Audunsson, H., Levi, S.), **98**, 613

Rheology

Rheological models and interpretation of postglacial uplift (Kürnig, M., Müller, G.), **98**, 243

Rock fracture

Light, radiofrequency emission and ionization effects associated with rock fracture (Martelli, G., Smith, P.N., Woodward, A.J.), **98**, 397

S. America

Extension related to a high topography: results from a microearthquake survey in the Andes of Peru and tectonic implications (Deverchère, J., Dorbath, C., Dorbath, L.), **98**, 281

Scattering

The attenuation of surface waves due to scattering (Brandenburg, A., Snieder, R.), **98**, 183

The effect of crustal scattering on observed high-frequency earthquake seismograms (Ebel, J.E.), **98**, 329

Fréchet derivatives and single scattering theory (Boerner, D.E., West, G.F.), **98**, 385

Seismic attenuation

The attenuation of surface waves due to scattering (Brandenburg, A., Snieder, R.), **98**, 183

Seismic data analysis

Deep seismic reflection processing in the complex demodulate domain: basic theory and application to residual static estimation (Roberts, R.G., Dahl-Jensen, T.), **98**, 543

Seismic fracture

Exactly solvable two-fault model with seismic radiation (Lomnitz-Adler, J., Peréz Pascual, R.), **98**, 131

Coupled seismic faults and the predictability of earthquakes by means of deterministic models (Lomnitz-Adler, J., Peréz Pascual, R.), **98**, 143

Seismic networks

Artificial intelligence techniques in seismic signal interpretation (Chiaruttini, C., Roberto, V., Saitta, F.) **98**, 223

Seismic phases

On the nature of regional seismic phases–I. Phase representations for Pn, Pg, Sn, Lg (Kennett, B.L.N.), **98**, 447

Seismic refraction

The Hatton Bank continental margin–III. Structure from wide-angle OBS and multichannel seismic refraction profiles (Morgan, J.V., Barton, P.J., White, R.S.), **98**, 367

Seismic signal processing

Artificial intelligence techniques in seismic signal interpretation (Chiaruttini, C., Roberto, V., Saitta, F.), **98**, 223

Deep seismic reflection processing in the complex demodulate domain: basic theory and application to residual static estimation (Roberts, R.G., Dahl-Jensen, T.), **98**, 543

Seismic source parameters

Spectral characteristics of the 1986 September 13 Kalamata (southern Greece) earthquake (Stavrakakis, G.N., Drakopoulos, J., Latoussakis, J., Papanastassiou, D., Drakatos, G.), **98**, 149

Seismic source region

The response of two joined quarter spaces to *SH* line sources located at the material discontinuity interface (Ben-Zion, Y.), **98**, 213

Seismic wave propogation

On the nature of regional seismic phases—I. Phase representations for Pn, Pg, Sn, Lg (Kennett, B.L.N.) **98**, 447

Seismicity

Extension related to a high topography: results from a microearthquake survey in the Andes of Peru and tectonic implications (Deverchère, J., Dorbath, C., Dorbath, L.), **98**, 281

Possible focal mechanism change during reactivation of a previously ruptured subduction zone and stress tensor implications (Tajima, F., Célérier, B.), **98**, 301

A revised and extended earthquake catalogue for Greece since 1900 (Makropoulos, K.C., Drakopoulos, J.K., Latousakis, J.B.), **98**, 391

Comments on 'Preseismic quiescence before large earthquakes in the Aegean and surrounding area' by Karakaisis *et al.* (1987) (Papadopoulos, G.A.), **98**, 403

Reply on the comments of G.A. Papadopoulos on the paper 'Preseismic quiescence before large earthquakes in the Aegean and surrounding area' (Karakaisis, G.F., Panagiotopoulos, D.G., Krimnianiotou, M.Ch., Papazachos, B.C.), **98**, 405

A microearthquake study in the Gulf of Patras region, western Greece, and its seismotectonic interpretation (Melis, N.S., Brooks, M., Pearce, R.G.), **98**, 515

Seismology

Ellipticity and density at the inner core boundary from subcritical PKiKP and PcP data (Souriau, A., Souriau, M.), **98**, 39
Exactly solvable two-fault model with seismic radiation (Lomnitz-Adler, J., Peréz Pascual, R.), **98**, 131
Coupled seismic faults and the predictability of earthquakes by means of deterministic models (Lomnitz-Adler, J., Peréz Pascual, R.), **98**, 143
The response of two joined quarter spaces to *SH* line sources located at the material discontinuity interface (Ben-Zion, Y.), **98**, 213
On horizontal wavefunctions in cylindrical coordinates (Mochizuki, E.), **98**, 395
Seismic modelling by Fresnel diffraction theory with application to wide-aperture data from SW Oklahoma (Sun, R., McMechan, G.A.), **98**, 603

Seismotectonics

The Makran earthquake of 1983 April 18: A possible analogue to the Puget Sound earthquake of 1965? (Laane, J.L., Chen, W.-P.), **98**, 1
A microearthquake study in the Gulf of Patras region, western Greece, and its seismotectonic interpretation (Melis, N.S., Brooks, M., Pearce, R.G.), **98**, 515
Seismotectonics and the earthquake frequency–magnitude distribution in the Aegean area (Main, I.G., Burton, P.W.), **98**, 575

Shear modulus

Determination of the seabed porosity and shear modulus profiles using a gravity wave inversion (Yamamoto, T., Trevorrow, M.V., Badiey, M., Turgut, A.), **98**, 173

Spherical harmonies

On horizontal wavefunctions in cylindrical coordinates (Mochizuki, E.), **98**, 395

Subduction

Observations of microseismicity in the southern Kuril Trench area by arrays of ocean bottom seismometers (Hirata, N., Kanazawa, T., Suyehiro, K., Iwasaki, T., Shimamura, H.), **98**, 55
Mantle flow induced by back arc spreading (Ribe, N.M.), **98**, 85
Finite element modelling of surface wave transmission across regions of subduction (Drake, L.A., Bolt, B.A.), **98**, 271

Surface waves

Crustal structure and possible anisotropy in Turkey from seismic surface wave dispersion (Mindevalli, O.Y., Mitchell, B.J.) **98**, 93
The attenuation of surface waves due to scattering (Brandenburg, A., Snieder, R.), **98**, 183
Three-dimensional modelling of upper mantle structure under the Pacific Ocean and surrounding area (Zhang, Y.S., Tanimoto, T.), **98**, 255
Finite element modelling of surface wave transmission across regions of subduction (Drake, L.A., Bolt, B.A.), **98**, 271
Surface waves in weakly anisotropic structures: on the use of ordinary or quasi-degenerate perturbation methods (Maupin, V.), **98**, 553

Synthetic seismograms

Numerical modelling of SH Lg waves in and near continental margins (Regan, J., Harkrider, D.G.), **98**, 107
The Hatton Bank continental margin—III. Structure from wide-angle OBS and multichannel seismic refraction profiles (Morgan, J.V., Barton, P.J., White, R.S.), **98**, 367
Seismic representation theorem coupling: synthetic SH mode sum seismograms for non-homogeneous paths (Regan, J., Harkrider, D.G.), **98**, 429
Seismic modelling by Fresnel diffraction theory with application to wide-aperture data from SW Oklahoma (Sun, R., McMechan, G.A.), **98**, 603

3-D modelling

A finite-difference algorithm for the transient electromagnetic response of a three-dimensional body (Adhidjaja, J.I., Hohmann, G.W.) **98**, 233

Thermal conductivity

Mineralogy, porosity and fluid control on thermal conductivity of sedimentary rocks (Brigaud, F., Vasseur, G.), **98**, 525

Transient electromagnetic method (TEM)

A finite-difference algorithm for the transient electromagnetic response of a three-dimensional body (Adhidjaja, J.I., Hohmann, G.W.), **98**, 233
Deep transient electromagnetic soundings with a grounded source over near-surface conductors (Newman, G.A.), **98**, 587

Turkey

Crustal structure and possible anisotropy in Turkey from seismic surface wave dispersion (Mindevalli, O.Y., Mitchell, B.J.), **98**, 93

Viscosity

Rheological models and interpretation of postglacial uplift (Körnig, M., Müller, G.) **98**, 243
Lateral heterogeneities in mantle viscosity and post-glacial rebound (Gasperini, P., Sabadini, R.), **98**, 413
